➡ Instructions

➡ How to add KUARIO Print in MAC OS X:

1. Open 'System Preferences'.

2. Open 'Printers & Scanners'.

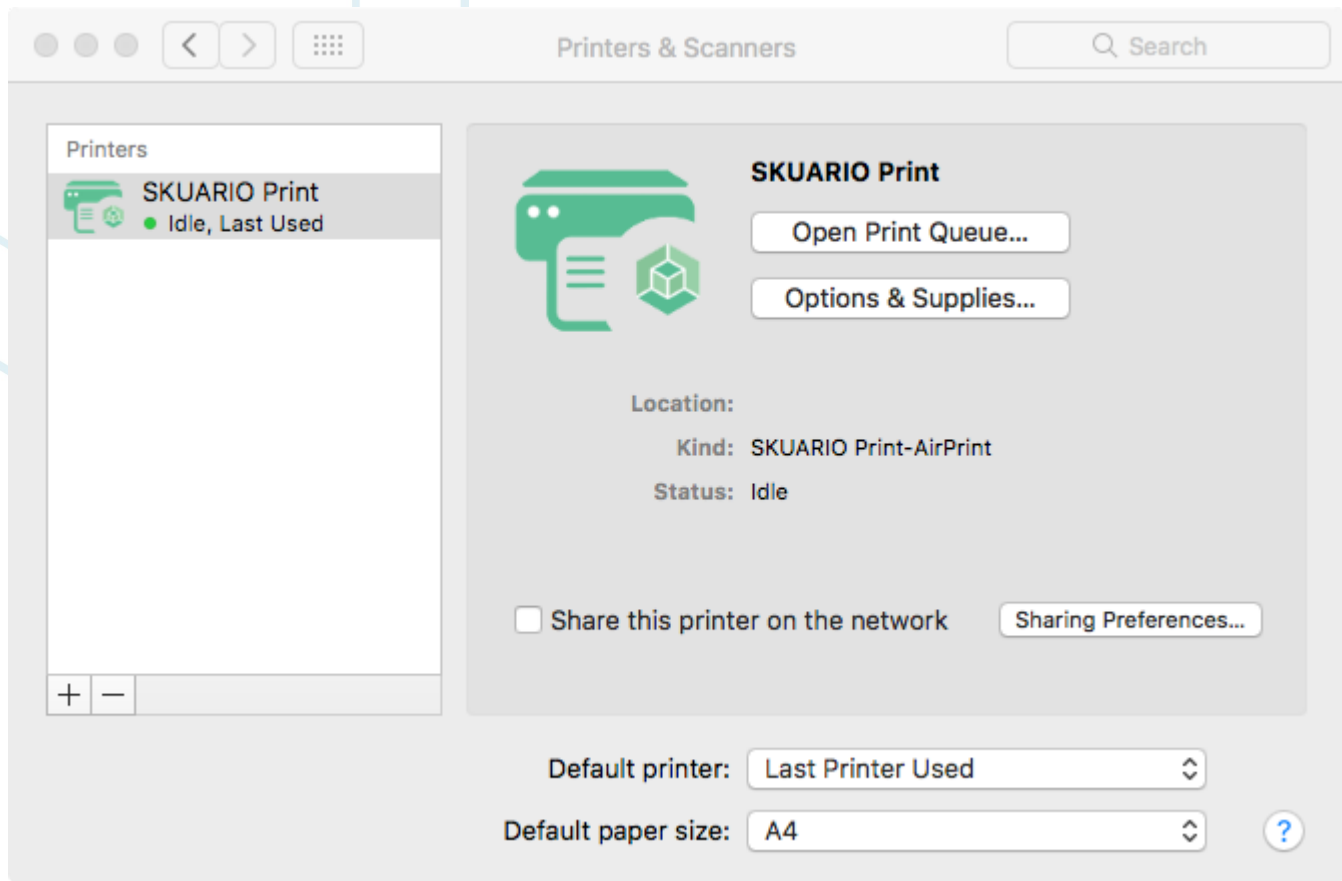

3. Click '+' and depending on the operating system version also 'Add Printer or Scanner...' to add a new printer.
4. Select the 'IP' tab.
5. Fill in the required fields.
 - a. Address: 'ipp.KUARIO.com:443'.
 - b. Protocol: 'AirPrint'.
 - c. Name: 'KUARIO Print'.

The screenshot shows a macOS 'Add' printer dialog box. At the top, there are three tabs: 'Default', 'IP', and 'Windows', with 'IP' selected. A search bar is located at the top right. The main area contains two sections of input fields. The first section has 'Address:' with the text 'ipp.skuario.com:443', a sub-label 'Valid and complete host name or address.', 'Protocol:' with a dropdown menu set to 'AirPrint', and an empty 'Queue:' field. The second section has 'Name:' with the text 'SKUARIO Print', an empty 'Location:' field, and 'Use:' with a dropdown menu set to 'AirPrint'. An 'Add' button is positioned at the bottom right of the dialog.

i Note: The system will detect the printer automatically.

6. Click 'Add' to add the printer.
7. The printer has been added and is ready to use.

i Note: You will be prompted for user name and password when printing a document. Use your KUARIO credentials to authenticate your print job.
